\*Payment by RFID, fuel cards, fobs, contactless card payment, online, Google, Apple apps

## Regulatory compliance

Open compliant networks to the public, leaning on our software and services to help manage reliability, contactless payment, and provide 24/7 helplines for drivers.

## Increased profitability

Maximise the number of onsite chargers without expensive electrical infrastructure upgrades using our in-built load management system.

## Manage grid capacity

Monitor the electricity needed to balance site and grid capacity with in-built load management systems, and set maximum supply limitations and safety buffers to avoid grid upgrades.

## Deliver reliability

Drive charge point reliability with fault alerts, 'click to fix' remote maintenance, and diagnostics to inform 'once and be done' site maintenance for fleet and public networks.

## Future-proof networks

Convert sites into easy-to-manage charging hubs using software that prolongs their lifetime without being locked into a long-term contract.

## Real time data and analytics

Manage your fleet through a single source of real time data, historical reports and analytics to reduce running cost and carbon footprint and increase productivity.

## Simplify admin

Reduce admin with payment flexibility\* and single billing reports, with full charger analytics available at-a-glance through our admin Dashboard.

## 24/7 driver support

Your dedicated Account Manager coordinates your charge point onboarding and our 24/7 support team handle issues at point of use to keep your fleet running every day.

# MONETISING YOUR NETWORK: GOVERNMENT GUIDELINES

Our software integrates a good driver's experience with charge point management for Smart Fleets. We also give you the flexibility to monetise your investment through industry leading features designed to meet Government and State regulations for public networks.

- View available chargers without paying or being tied to T&Cs 
- Roam across charging networks with single app or RFID card 
- Pricing tariff clearly shown at the start of a charge (set for entire charge) 
- Contactless bank card payment including Google and Apple Pay 
- 24/7 Helpline advertised on all chargers for drivers in difficulty 
- Fault alerts and 'click to fix' maintenance supports 99% reliability 

\*Drivers can sign up, start a charge, and pay in a fully realized Welsh language App

We're ISO accredited  
and on the following frameworks:

Crown Commercial Service

Efficiency East Midlands Ltd
